About

I am a Fullstack Developer skilled in developing efficient and scalable web applications using technologies such as HTML, CSS, Typescript, Node.js, React, Vue, Dotnet, and SQL. I am committed to delivering clean, maintainable code and collaborating with cross-functional teams to deliver high-quality software solutions that meet business requirements and user needs. I am passionate about staying up-to-date with emerging technologies and expanding my skills and knowledge

Experiences

PT. Minda Perdana Indonesia

Frontend developer (2021 - 2022)

Built and maintained an e-learning application using modern React and Ant Design.

PT. Hanatek (Freelance)

Frontend developer (2022 - present)

Built and maintained an alumni portal website that designed to connect and engage alumni of UPN Yogyakarta mining department. This website was built using Nextjs, GraphQL, and Typescript

PT. Alfaeeza Niaga Internasional

Fullstack (2022 - present)

As a developer responsible for building and maintaining an application using DotNet, React, and Vue. My job involves designing and developing scalable and efficient software solutions. I am skilled in working with the latest technologies and best practices, ensuring that the application is optimized for performance and meets user needs. Additionally, I am committed in maintaining and improving the application over time, implementing updates and new features as required.
